REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 1-5, 8-10 are allowed because none of the prior art alone or in combination teaches or suggests the particular subset of the process steps intermediary cleaning process is performed 1~3 minutes, and wherein the intermediary cleaning process further comprises the steps of: using O₂, Cl₂ and SF₆ as a first cleaning gas for about 30 second, and using Cl₂, and HBr as a second cleaning gas for about 50 seconds.

Claims 11-23 are allowed over the prior art because none of the prior art alone or in combination teaches or suggests the particular subset of the process steps in forming a capping layer with a bird's beak overlying the polysilicon layer, and etching each of the polysilicon layers in sequence in a plasma chamber using the overlying capping layer as an etch mask to form a floating gate on each of the floating gate dielectric layers, a polymer layer being deposited over the inner wall of the plasma chamber during the etching, wherein an intermediary cleaning process is performed in the plasma chamber between the etchings before the deposited polymer layer reaches such a degree as to induce lateral etching on the next polysilicon layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
